The MSU College of Engineering celebrates the achievements of its students by hosting Design Day, where student teams exhibit their design projects and compete for awards.

Design Day attracts hundreds of visitors from around the country including family, faculty, students, and corporate sponsors.

Design projects are pervasive throughout the engineering curriculum, beginning with the freshmen cornerstone course and culminating in the senior capstone courses.

All of the MSU engineering academic programs are represented at Design Day involving freshmen through seniors. Hundreds of middle and high school students travel from across Michigan to explore design principles with hands-on activities, encouraging them to pursue careers in engineering.

Design Day concludes with an awards ceremony highlighting the best projects from across the College demonstrating that MSU engineers are prepared to lead, create, and innovate.
